

Evaluatie van serious of simulation gaming

Op welke manier en in hoeverre is je game effectief?

Hoe meet en weet je dat?

Gebaseerd op: Mayer, I., Bekebrede, G., Harteveld, C., Warmelink, H., Zhou, Q., van Ruijen, T., Lo, J., Kortmann, R. and Wenzler, I. (2014), The research and evaluation of serious games: Toward a comprehensive methodology. Br J Educ Technol, 45: 502–527. <http://doi.org/10.1111/bjet.12067>

Quasi experimental design

O1 = Observation 1 Learning objectives, context

O2 = Observation 2 pre-game measurement

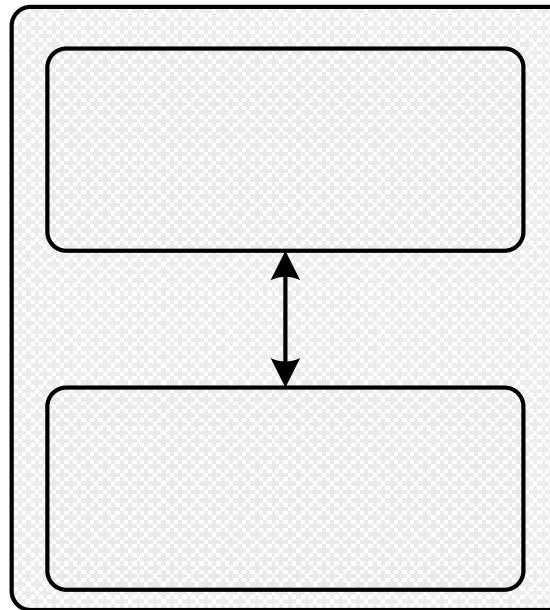

X = Intervention = gaming session

O3 = Observation 3 post game measurement

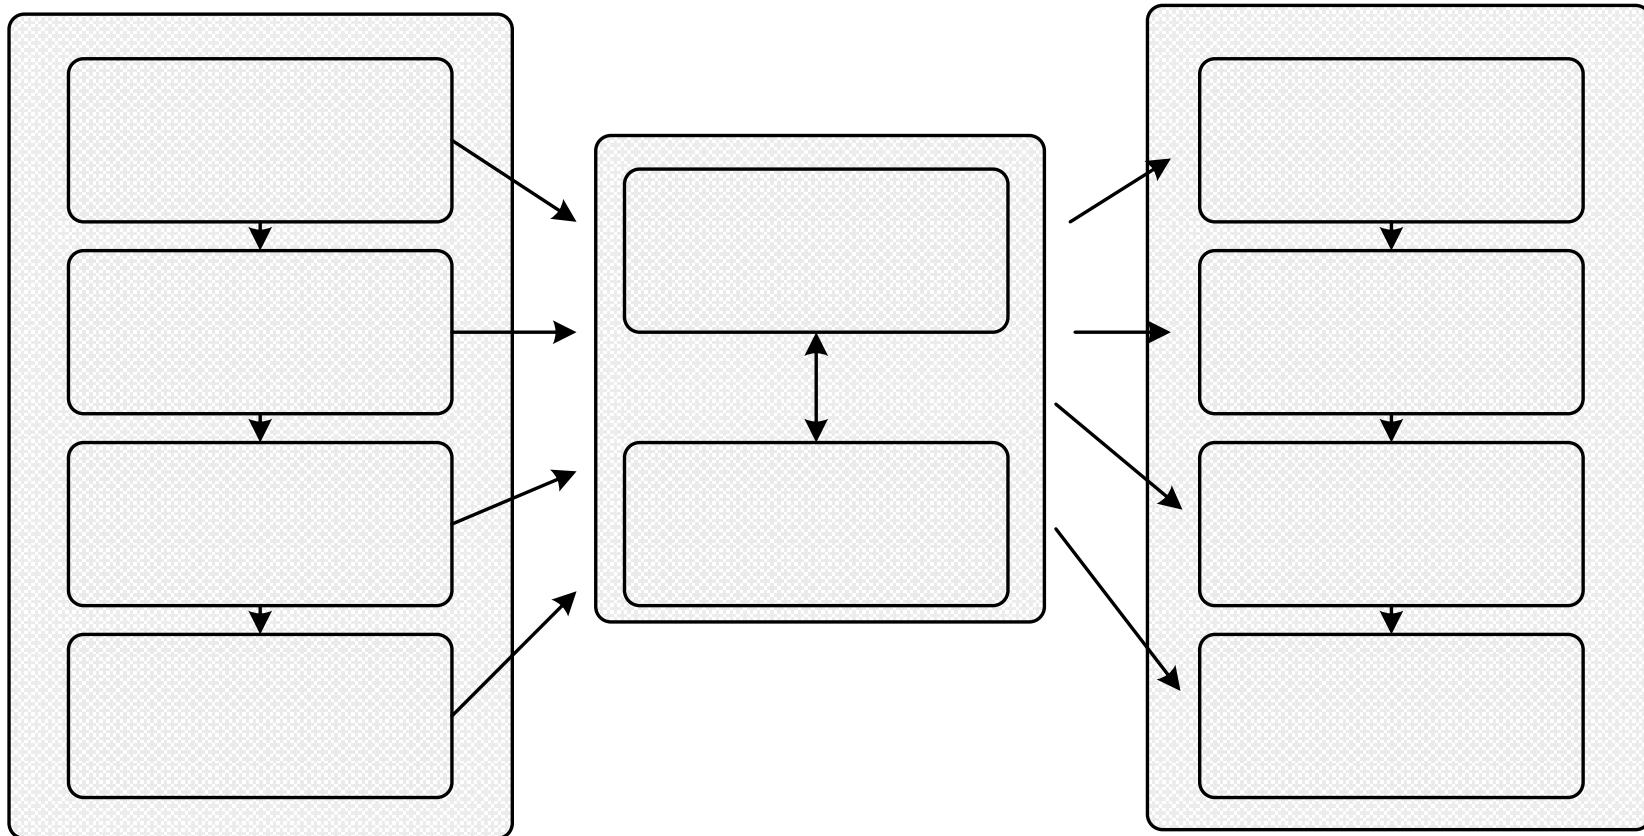

O_{x1...n} = In game observations / measurements

O4 = Observation 4 Learning objectives, context

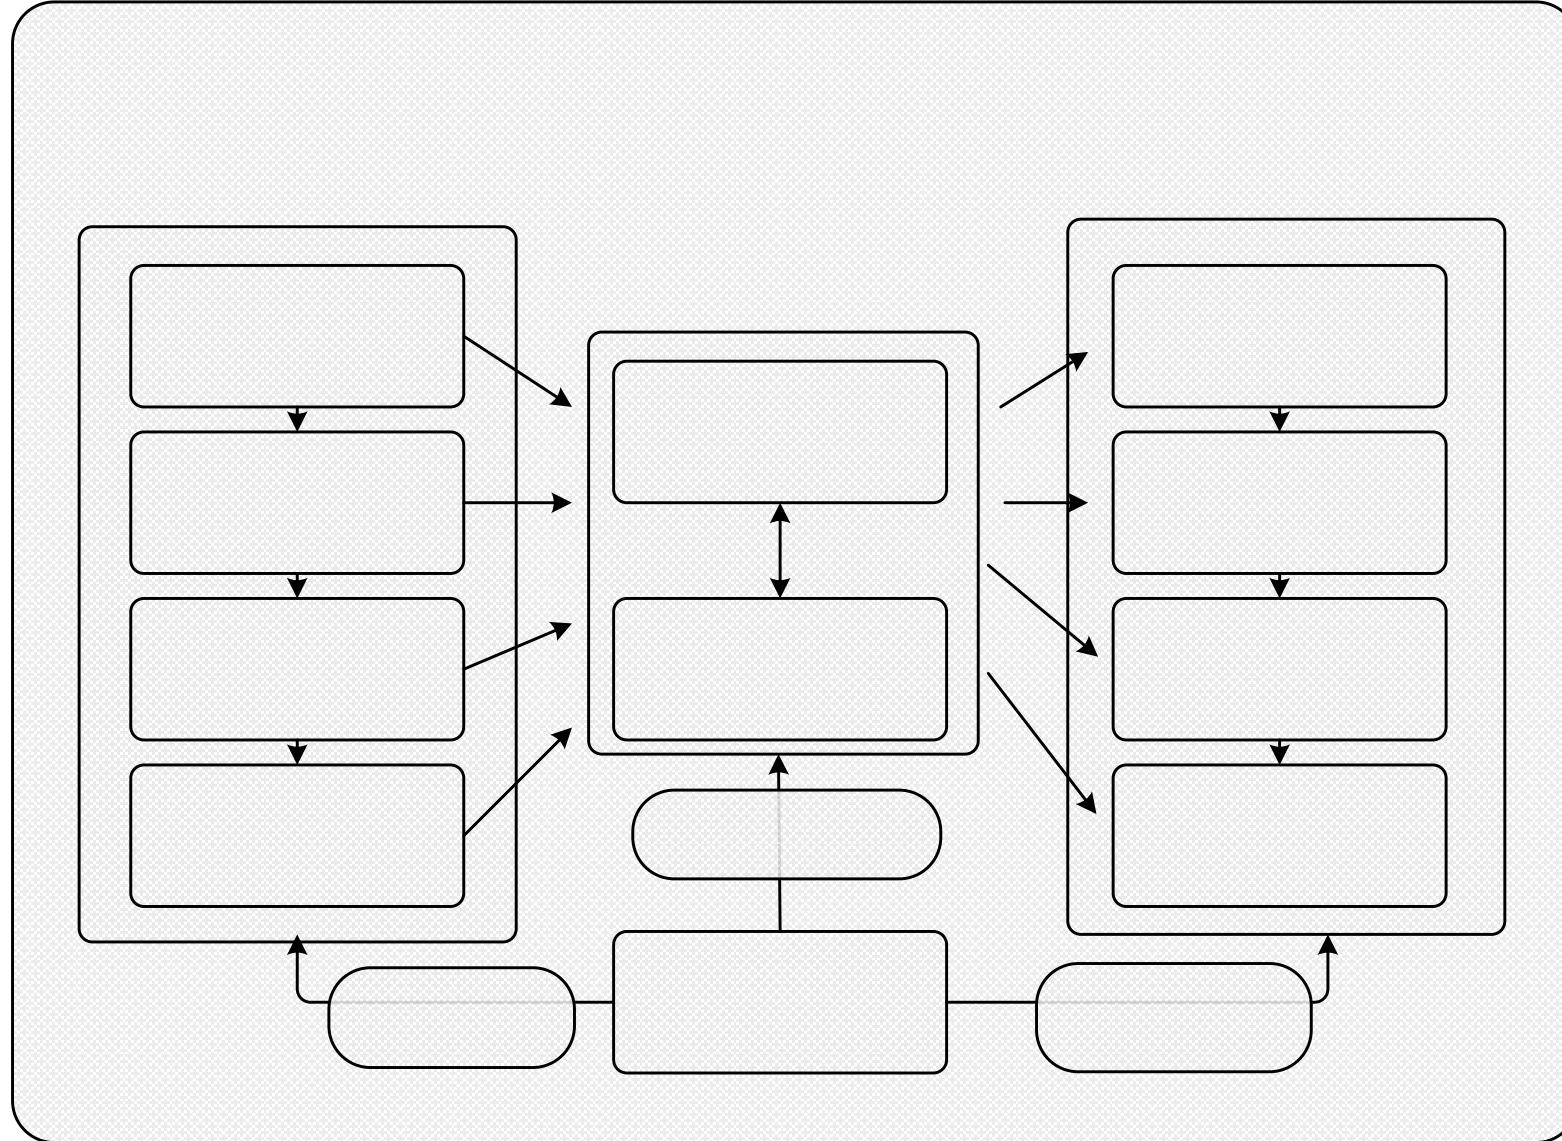

The dependent variable

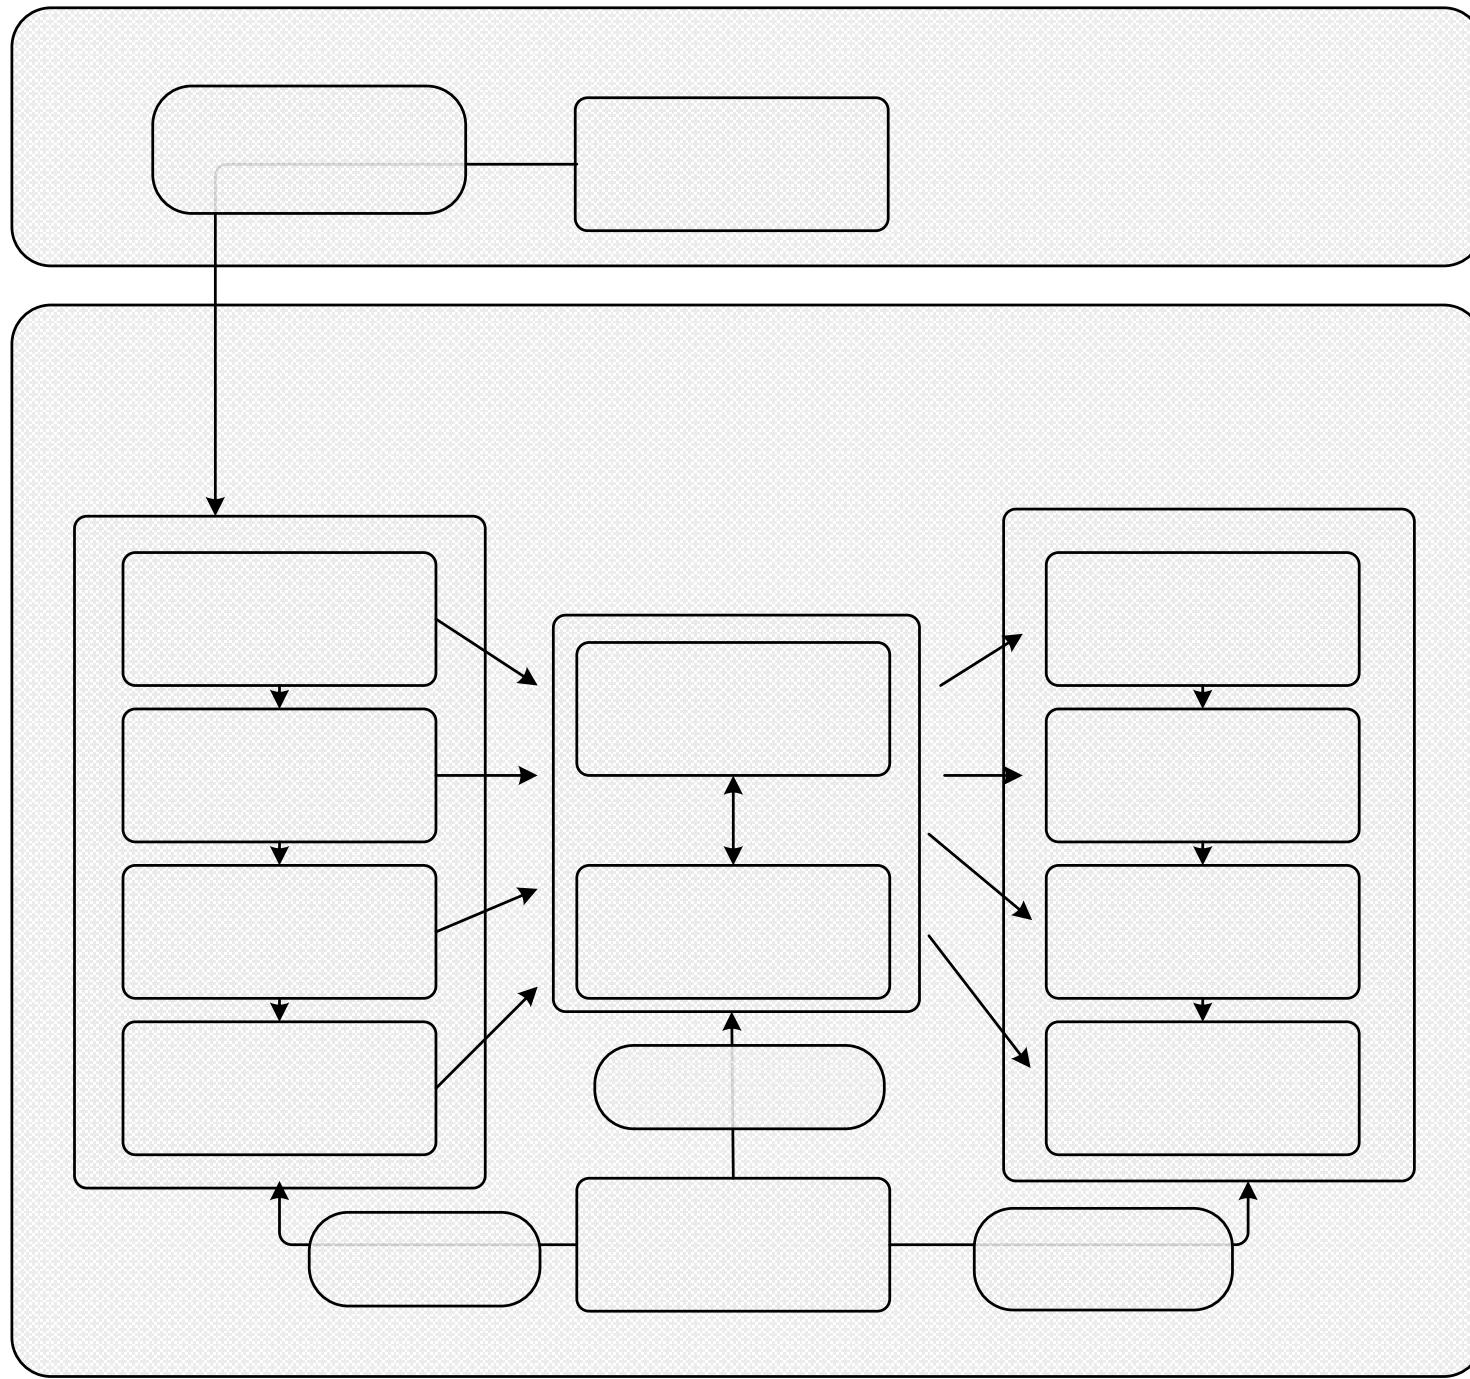

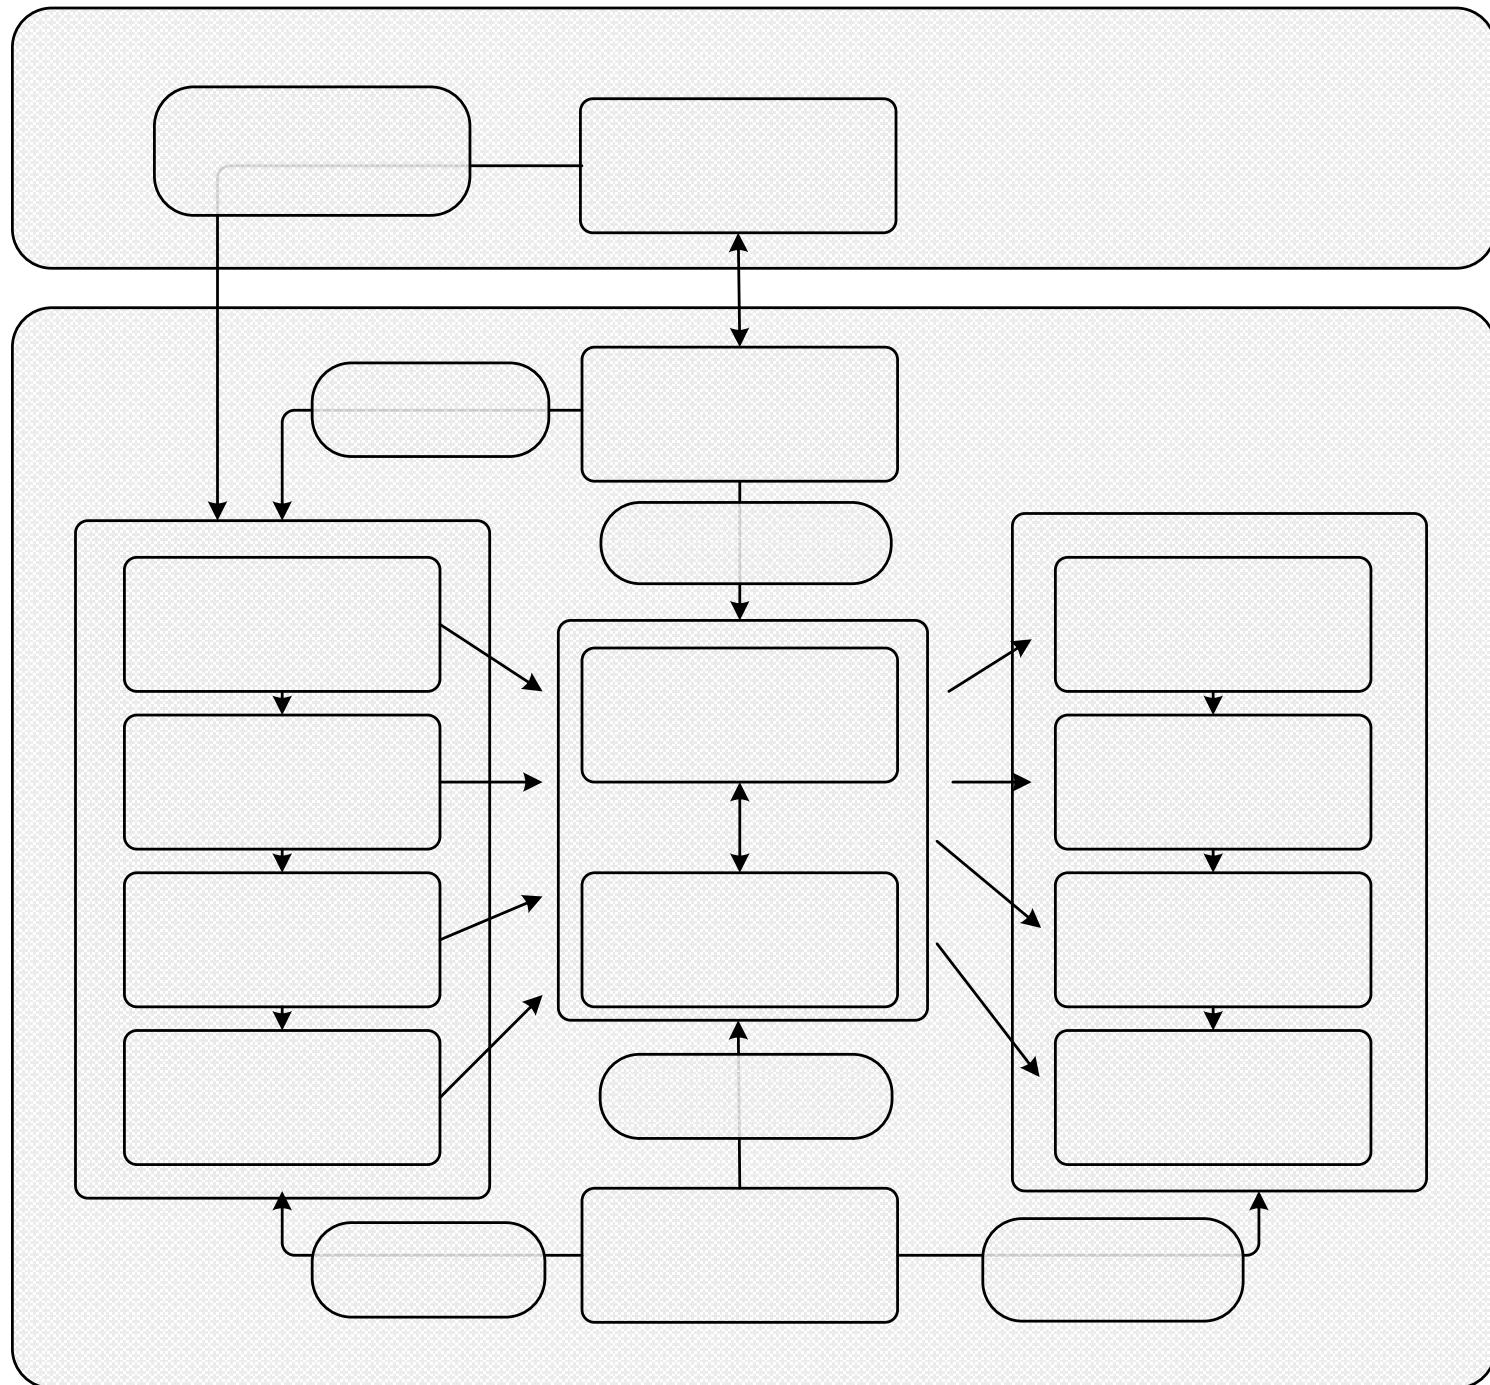

Independent variables

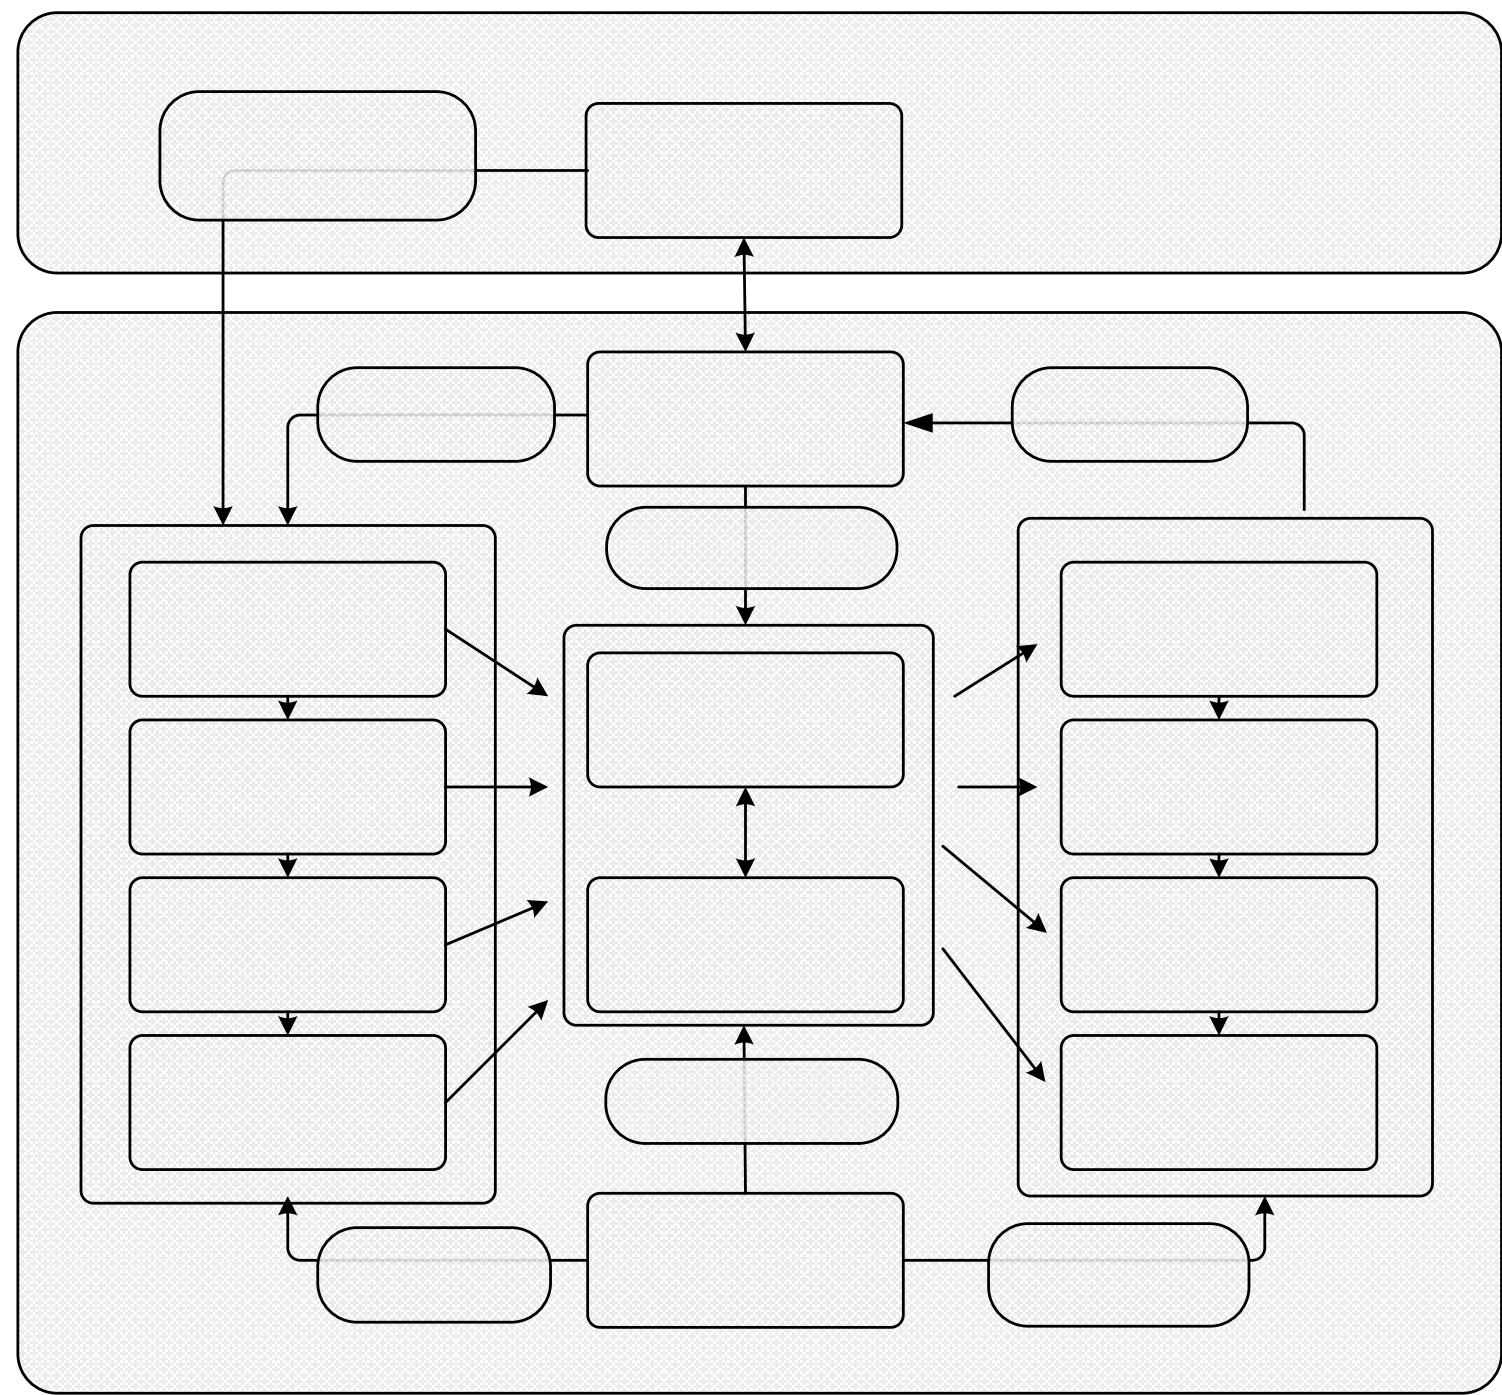

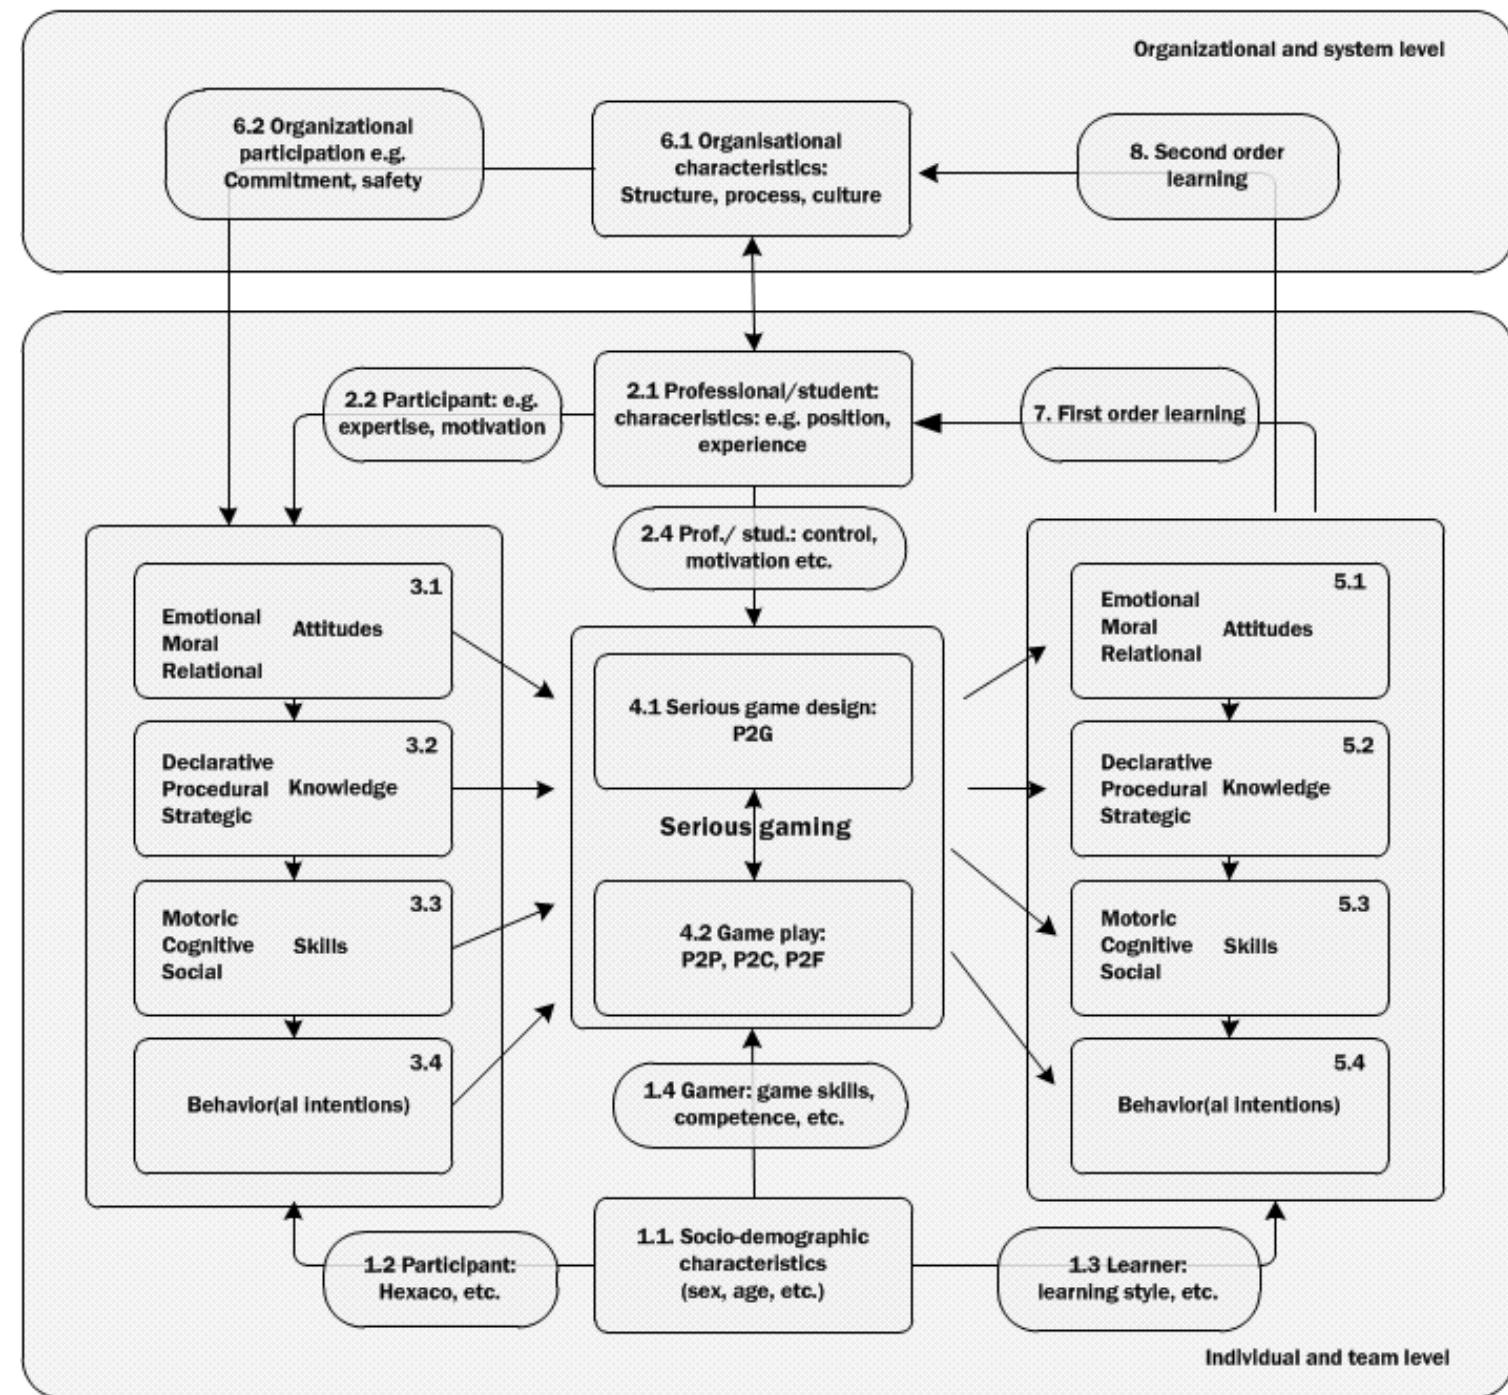

Intermediating variables

Tips & tricks

- Definieer duidelijke en realistische effect-/impactverwachtingen...
 - ...realiserend in welk domein je opereert...
 - ...en stem je onderzoeksontwerp daarop aan
-
- Gebruik zover nodig reeds gevalideerde vragenlijsten
 - Gebruik bestaande software en raamwerken voor game analytics
